

# WORKSHOP AGENDA

## July 19<sup>th</sup>

8:30-9:00

**Late Registrations**

9:00- 9:10

**Welcome - Introductions**

9:10- 10:00

**Dixie Chichester**

Define and discuss the purpose of rain gardens; outline the elements of a rain garden; provide details on how to build a rain garden and then discuss proper planting techniques along with appropriate plants to use in rain gardens.

10:00 – 11:00

**David Kluttz**

Integrated Aquatic Weed Control.

11:00 – 12:00

**Tracey Morgan & David Marcel**

How does a landowner safeguard both the natural resources we enjoy in a rural lifestyle while also guarding your property from the erosional forces of Mother Nature? Stream bank and shore restoration practices protect both. Get to know the Conservation District's Cost Share Program benefits, options, and other information available for managing your property.

12:00 – 12: 30

**Lunch – Provided**

12:30 – 2:10

**Scott Jungblom**

Scott will show hands on via buckets of weeds, what is and isn't native. Overview various tools and methods available to waterfront owners for managing the plant growth along their frontage; and, have videos running that demonstrate these tools and methods.
